

7-WEEKS, 1 APP

10 Boston College students came together to make an Android and iOS app in 7 weeks for Peace Corps, with little to no mobile development experience.

HOW THEY DID IT

NEEDS ANALYSIS

They spoke with the client, identified their key problems and found solutions

1

WIRE FRAMING

They brought ideas into a framework of screens and actions to solve the problem

2

DESIGN AND UX

They created an effective user experience through UX and color design

3

PROG RAMMING

Largely from zero to hero, everyone learned the elements making an app

4

QUALITY & TESTING

The final step in ensuring the client really gets what they need and deserve

5

YOU SHOULD COME!
